Subject index

Ab initio computation 255
Allylic resonance 7
Ammonium iodine 305
Angular overlap model 59
Anharmonicity 41
Aromaticity 277
Atomic Hartree-Fock 149

Basis sets 401
Benzene 201, 289
Binding energy of iodine complexes 305
π-Bonding 59
Bond orders 277
Bond strength 411
nd Bonding 449

Calculation 385
Carbonyl ylide 7
CASSCF-CI 411
$Ce(NO_3)_6^{2-}$ 21
Chalcogenide glasses 385
Close coupling 333, 359
Cluster expansion 201, 231
Collinear hydrogen isotope reaction 425
Conjugation 299
Configuration interaction method 187
Correlation 375
Curvilinear coordinates 75
Cyanine spectra 299

Density functional 401
Diagonalization 169
Differential cross section 359
Dipole moment 255
Disordered complex lattices 479

Effective potential 375
Eigenvector 169
Elastic scattering 359
Electric field gradient 385
Electron correlation problem 187
Electron scattering 333, 359
Electronic structure 1
Energy gradient calculation 91
Excited state 201
Excited states 467
Exponentially generated wave function 201
Extended Hückel 385

Finite element method 425
Frequency shifts 41
Frontier orbital 7
Full CI 263

Gaussian basis sets 237
Givens, EISPACK 169
Graphical presentation 75
Graph theory 299
Hartree-Fock stabilitiy 1
